

The Polytechnic University Shares its Experience at “Autodesk ATC Summit”

At the end of May Moscow saw the International “Autodesk ATC Summit”. Representatives of the best authorized educational and certification Autodesk centers, academic educational centers and foreign partners took part in it. Peter the Great St. Petersburg Polytechnic University was represented by the director of the Institute of Civil Engineering (ICE) Nikolay Ivanovich VATIN and the director of the International Research and Educational Center “Autodesk-Polytechnic” Evgenia Ivanovna TUCHKEVICH.

The summit participants had time to learn about the changes in Autodesk products, successes and experience of the best higher education institutions in the world, the activity of the International “Certification Specialist Association” and new certification examination technology platform “Ceriport”.

Among the distinguished guests there was Herbert Beckelmann, the senior manager of EMEA Autodesk Education region.

The experts of the International “Certification Specialist Association” pointed out the high quality and correspondence to the international educational standards in the Polytechnic University. A valuable contribution to training specialists for the industry is made by the Graduate School of Engineering (GSE), Institute of Computer Science and Technology (ICST) and the Institute of Civil Engineering, where the strategic partnership with Autodesk is realized successfully.
