

The fourth season of the Open Doors International Olympiad is officially over

The fourth season of the International Olympiad [Open Doors: Russian Scholarship Project](#) was officially completed. In total, more than 56 thousand foreign undergraduate and graduate students from 197 countries participated in the Olympiad - 1.6 times more than last season. The winners of the intellectual competition - future international Master's degree and Ph.D. students - were given the opportunity to study at the expense of the Russian Federation's budget at the leading universities of our country. Polytechnic University chose more than 30 winners of the Master's degree track. The geography of the countries is very diverse: most of the future polytechnics will come from Yemen, Jordan, Nigeria, Pakistan, Kazakhstan, and Uzbekistan. Also in the lists of countries are Brazil, China, Nicaragua, Sudan, Zimbabwe, India, Indonesia, Egypt, Afghanistan, Mozambique, Moldova, and Kenya.

Let us remind you that the Open Doors Olympiad allows foreign applicants to choose for further studies in Russian and English the programs offered by Russian universities - members of the Global Universities Association. Winners of the Olympiads, who have made their choice in favor of Polytechnic University, plan to

continue their education in different fields of study – power engineering and electrical engineering, biotechnology, mechanical engineering, construction, business and informatics, management, and linguistics.

Earlier we have already published an interview with winners of Open Doors competitions of previous years. A student from Uzbekistan [Nina KOLOSOVA](#) studies at SPbPU thermal power engineering, [Tony MAYAMBALA](#) from Uganda masters digital finance, economics, and business analytics, and [Dmitry PROSHKIN](#) from Lithuania made his choice in favor of automobile construction technologies. All of them also once took part in competitive tests of the Olympiad, and they proved by their example that entering a Russian university is realistic. And thanks to the variety of SPbPU educational programs, everyone will be able to find something to their liking, study, and develop to become a sought-after specialist and expert in their field in the future.

Prepared by the SPbPU International Office
