

## International Polytechnic Summer School was launched

The International Polytechnic Summer School 2023 officially opened at SPbPU. On July 3, the first programs of the season started: «[Space Technologies](#)» and «[Plasma Physics and Controlled Fusion](#)».

Students from all over the world come to SPbPU for two weeks to complete programs in areas where our university is a recognized world leader. This year's International Polytechnic Summer School brought together students from such countries as China, Iran, Iraq, Morocco, Bosnia and Herzegovina, Zambia, France, Italy, Germany and Mexico.

More than 300 international students will study engineering and natural sciences, space technology, information and digital technology, energy, business and economics, social sciences, the Russian language and culture from July through September.

In total, the organizers of the summer school have prepared more than 35 educational modules. The most popular programs to study this year were:

- Artificial Intelligence
- machine learning
- cross-cultural communication and research.

Upon completion of each Summer School course, students who have successfully completed the course will receive a certificate of completion with ECTS credits. This certificate enables students to retake the course at their home institution as part of their core educational program.
