

## Seeing in the New Year in Iran favors cooperation with Polytech

For years now SPbPU has been involved in a long-running cooperation with Iranian universities.

A serious breakthrough in cooperation was the participation in the second Forum for Top Iranian and Russian Universities which was hosted by the University of Tehran on the 19th - 20th October, 2016. The forum culminated in the signing of agreements with Sharif University of Technology and Iran University of Science and Technology and new patterns of partnership were determined. According to Vice-Rector for International Relations Mr. D. Arseniev the first step towards these agreements was taken at the first Forum which had been attended by rector of SPbPU Mr. Rudskoy. The Forum marked the beginning of a new stage of partnership evolution for SPbPU and the Islamic Republic of Iran.

‘We work incessantly to consolidate and promote cooperation with the overseas partners, expand our contact list into new regions and look out for mutual interests. Obviously, to be successful a university must live up to the world standards of higher education. However, its success largely depends on the ability

to forecast partnership opportunities with universities across the globe and outline new areas of cooperation with them' – said Mr Arseniev.
