In the nomination «Engineering» the ranking includes 1488 universities representing 97 countries. SPbPU was ranked in the top 3 in this category among all Russian universities. In the world ranking Polytechnic University is located in the group of places 301-400. When compiling the ranking, experts evaluated universities in five main areas: engineering, electrical and electronic engineering, mechanical and aerospace engineering, civil engineering and chemical engineering.

Polytechnic University was also among the top 3 Russian universities in the subject area «Physical Sciences». In the world ranking in this discipline, the university ranks in the group of 176-200. In the subject area «Computer Science»

Polytechnic University is among the top-5 Russian universities. In the world ranking in this subject area, 1122 universities from 83 countries are represented. In the world ranking Polytechnic University is in the group of places 301-400. Experts took into account the success of universities in software development and design, data science and analytics, cybersecurity, theoretical computing, etc.

We would like to add that Polytech was also included in the top 5 of the national ranking for pedagogical research and top 4 in the subject branch «Business and Economics».

The university's high positions in various subject areas of the ranking emphasize the relevance of our chosen model of university development. As a leading polytechnic university in Russia, we train highly qualified specialists for the widest range of Russian economy and industry. Our scientists make a significant contribution to the development of world science. I am convinced that high positions in the ranking are a common victory of all members of our polytechnic fraternity, said Rector of SPbPU, Academician of the RAS Andrei Rudskoi.
