

The International Summer School continues at SPbPU

Polytechnic University hosts an International Polytechnic Summer School. It has brought together many students from all over the world, including from SPbPU partner universities. For example, students from Nanjing University of Science and Technology, with which Polytechnic University signed [a cooperation agreement](#) in May 2024, took part in the course «Smart Manufacturing and Digital Future».

The program of the school was rich and varied. Students visited the laboratories of the Graduate School of Cyber-Physical Systems Management, where they studied advanced methods in robotics, smart manufacturing systems and modeling. The participants actively worked on projects in which they solved real-world problems in order not only to acquire new knowledge, but also to apply it in practice. The students learned how modern technologies can be integrated into various spheres — from industry to healthcare.

Summer school participants Sun Gechen and Jin Shouyu shared their impressions.

International Polytechnic Summer School programs are a convenient format for international students who want to explore new areas, gain new knowledge and skills, and work in an international team on exciting projects.

All participants of the International Polytechnic Summer School will receive international certificates with ECTS-credits.
